ATOM ™

MEET THE NEXT GENERATION
TOTAL OFFICE MANAGER

Meet Atom. The Next Generation Total Office Manager.

I'm Atom. I am pleased to meet you! Let me show you how I can help manage your everyday business tasks.

Need to tell callers when you're in a meeting?

No problem!

Schedule a lunch meeting at noon?

You've got it!

Need to separate personal and business communications on your mobile device?

I can do that.

On the move? That's okay. **I know your location.**

Atom hears you – simply speak up.

Atom is built with the world's leading speech recognition engine, Nuance®, which uses your voice to manage your messages, calendar, calls and availability from anywhere — even while driving.

"Call John Smith."

"Get new messages."

"Get my calendar for today"

Atom tells others when you're away.

Atom is always in sync with your calendar and will notify callers when you are "at lunch and will be back at 1 pm" or "in a meeting and will be back at 10 am." On vacation?

Atom will let your callers know. Atom also keeps an eye on your IM presence and will not send calls to your device when set to "do not disturb".

"Atom is a first in the enterprise mobility industry."

Michael Finneran,
Principal, dBrn Associates, Inc.

Atom knows your location.

Atom's location-based services know when you've arrived at the office, reached home or are anywhere in-between – and will deliver your calls to the optimal device.

Atom goes mobile when you do.

Atom is built with the most sought after mobile features: unified messaging, hands free speech access, single number reach, mobile number protection, location-based services and a native mobile client to manage messages, contacts and presence status. Plus, Atom is just as concerned about security as you are, and will not store any business data on your personal mobile device. Atom keeps you connected to the office, wherever you go.

Atom connects to the cloud.

Atom manages your office applications regardless of whether they are in the cloud or in the office. Atom connects to your email, contacts and calendar to deliver unified messaging, contact dialing and calendar management. Need access to voicemails, faxes and emails in a single location, accessible on any device? Driving to work and want to know what's on the schedule for today? Need to accept that meeting request your client sent? Making a call from the road and need to look up the contact in your address book? Atom is always with you to maximize your productivity.

Atom speaks your language.

Whether it's US English, US Spanish, Canadian French, UK English, Swedish or Australian English – Atom speaks your language and understands you.

Atom provides a personal touch to important callers.

When you're unable to take an important incoming call, one of Atom's unique qualities is to relay a brief personal message to your caller. Atom identifies the caller so you can "Acknowledge" them by sending a quick personalized message back. "John, I have someone in my office at the moment, I will call you back in 10 minutes."

"AVST offers
best of breed
Unified Messaging."

Blair Pleasant
President & Principal Analyst
COMMFusion LLC

Industry's Most Interoperable, Unified Communications Platform

Ideal for Midsize Business to Multi-Site Global Enterprises

CX-E is the industry's most interoperable UC platform on the market. The extensive interoperability of the CX-E platform was developed specifically to support enterprises seeking to deploy UC in a rapidly evolving IT landscape – telephony, email and/or corporate databases – on-premise, in a private or the public cloud and/or a hybrid configuration. By deploying AVST's CX-E UC platform as part of an overall UC solution portfolio, an enterprise can avoid single vendor lock-in, achieve their high availability objectives and centralize their UC infrastructure into a data center/private cloud configuration. CX-E delivers best of breed UC mobile, voice and business process applications including: Atom's native mobile client for iPhone and Android; speech-enabled automated attendant and Atom; unified messaging; single number reach with intelligent call routing; mobile number protection; location based services; federated presence and identity; voicemail; fax; notification; and other business process integration capabilities.

Industry's Most Economical, Turnkey, Feature Rich IP-Enabled UC Solution

Ideal for Small and Midsize Business

CX-S is the right choice for any small or midsize business that demands an enterprise-class UC solution at an economical price point! CX-S comes standard with AVST's best of breed UC applications including: Atom's native mobile client for the iPhone and Android; speech-enabled automated attendant and Atom; unified messaging; single number reach with intelligent call routing; mobile number protection; location based services; federated presence and identity; and voicemail – all on the industry's most interoperable UC platform. CX-S integrates with all major IP-PBX brands and email systems including both – premise and public cloud solutions. Plus CX-S is easy to deploy and maintain. All CX-S software ships pre-installed on a server and is packaged with a three year hardware and software warranty.
